

Third Quarter 2022 Investment Activity

In Q3 2022, the equity and debt markets experienced significant volatility with continued uncertainty around inflation, recession fears, and the global geo-political climate. With that challenging backdrop, Clearlake successfully announced several new transactions.

Clearlake also closed its third Clearlake Opportunities Partners ("COP") Fund with more than \$2.5 billion in commitments. The firm continues to execute on its all-weather strategy, deploying flexible and creative capital across control and non-control investments.

Exit Updates:

Clearlake Completes Sale of Brightly Software

Under Clearlake's ownership, Brightly transformed into a leading cloud-based asset management software platform with a broad suite of products solving operational and planning needs.
