

## First Quarter 2024 Investment Activity

*In the first quarter of 2024, Clearlake closed one platform, five add-on transactions, as well as announced two full or partial exits. We believe the take-private of Alteryx showcases our commitment to support advancements in AI and cloud analytics.*

*We fully exited Janus International Group, Inc. (NYSE: JBI) in December 2023. Clearlake originally invested in Janus in 2018 and has since executed several initiatives under Clearlake's O.P.S.® value creation playbook. We continue to look forward to following the Company's future successes.*

*In a volatile deal environment, consistent with our long-term approach, Clearlake pivoted to focus on special situations opportunities. We actively sought investment opportunities outside of typical buyouts to harness the flexibility of our strategy – remaining agnostic to entry point and considering opportunities across private equity, special situations, structured equity, and distressed/opportunistic credit.*

### Platform Updates:

#### Clearlake Completes Acquisition of Alteryx

Alteryx is a provider of artificial intelligence for enterprise analytics.

### Exit Updates:

#### Hi-Crush Inc. Divests Its Permian Basin Proppant Production Assets and North American Logistics Operations

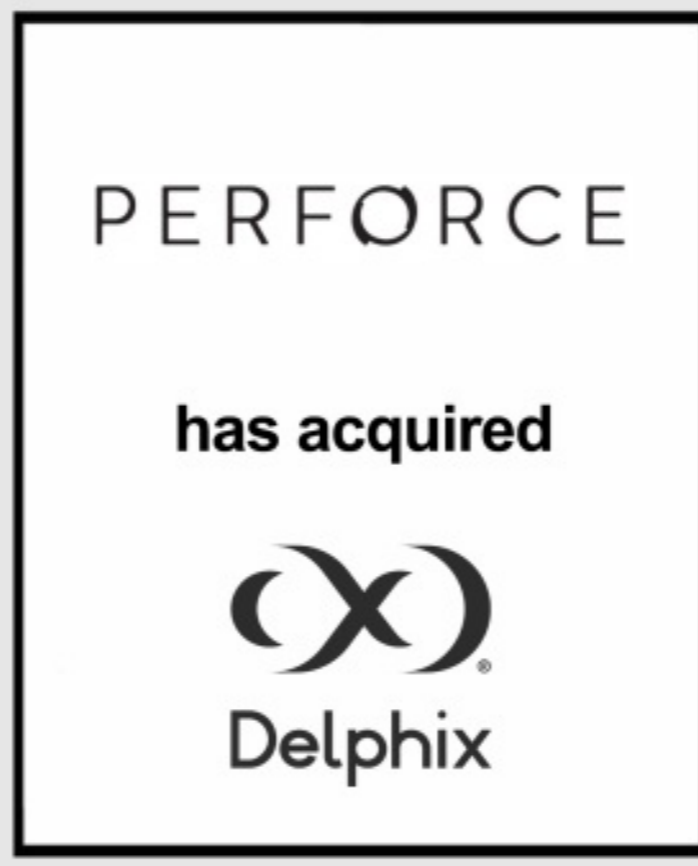

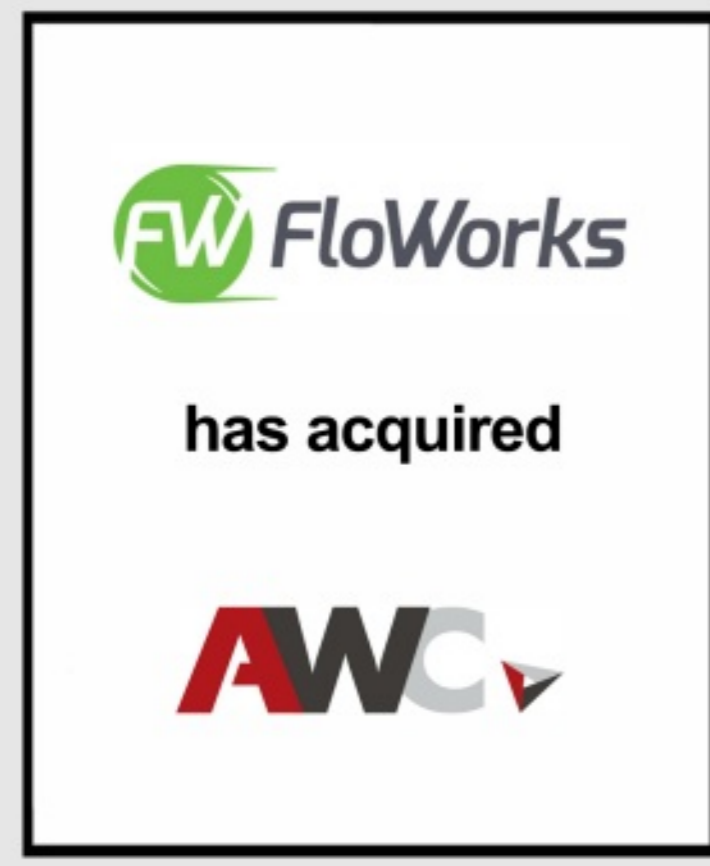

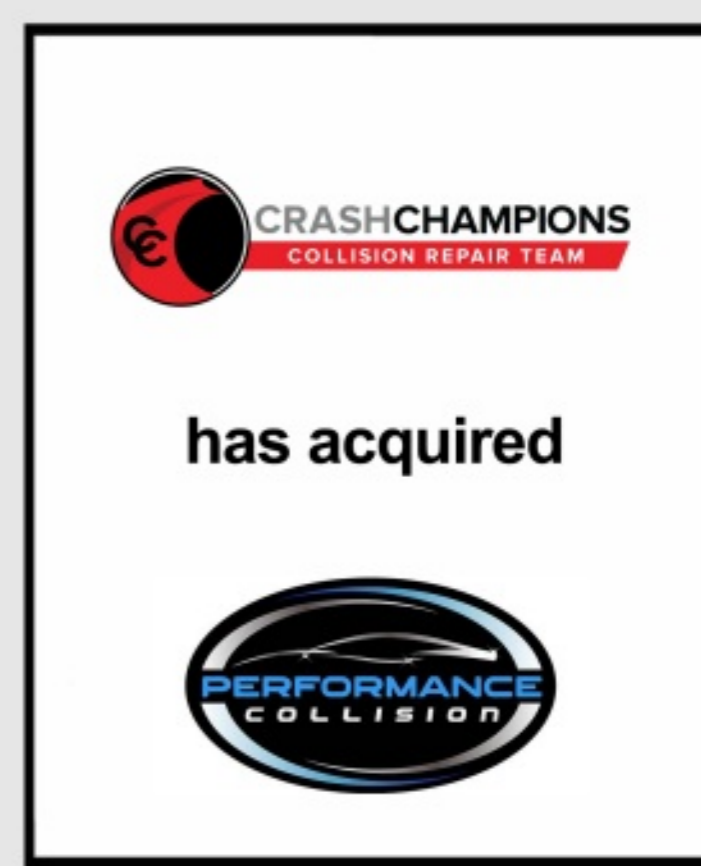

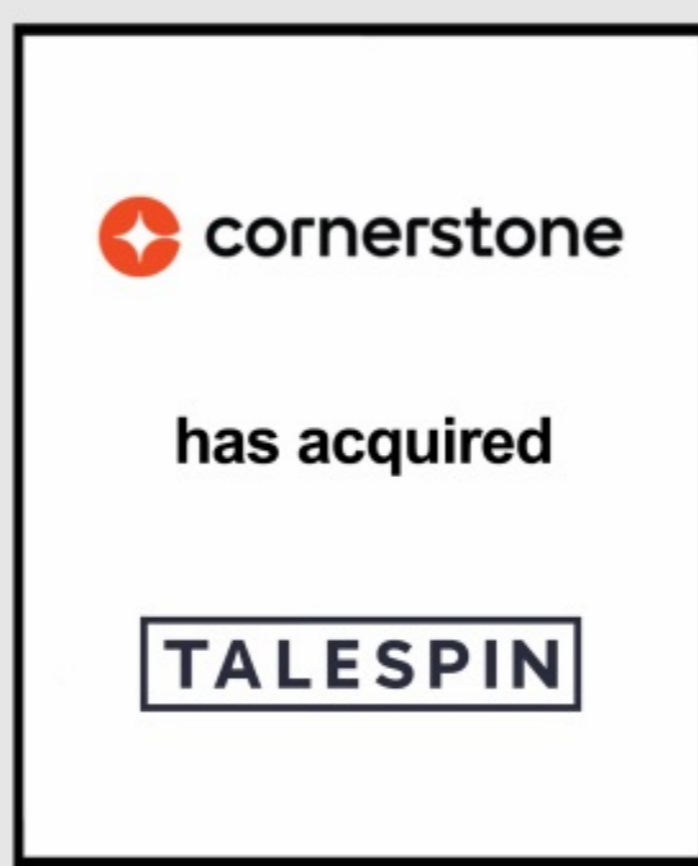

Atlas Energy Solutions Inc. (NYSE: AESI) acquired Hi-Crush's Permian Basin assets in a transaction valued at \$450 million.

#### Clearlake Fully Exits Janus International

Under Clearlake's ownership, Janus more than doubled EBITDA and executed on numerous initiatives under Clearlake's O.P.S.® value creation playbook.

### Select Add-On Acquisitions:
