

Second Quarter 2024 Investment Activity

In the second quarter of 2024, Clearlake closed one platform and four add-on transactions. Clearlake also announced the anticipated acquisition of Software Integrity Group from Synopsys in a transaction valued at up to \$2.1 billion. Clearlake believes this demonstrates the firm's capabilities in executing large-scale carve-outs, and underscores our commitment to identifying and unlocking value in sectors where we can make meaningful impact.

Clearlake aims to maintain a steady and thoughtful approach as we assess new opportunities. We also continue to support our portfolio's organic and inorganic growth initiatives, endeavoring to provide our companies with the resources and guidance needed to succeed. We are encouraged by the increase in deal volume seen over the past few months and are optimistic in deal flow going forward. By staying true to our long-term objectives, we aim to create sustainable value.

Platform Updates:
